GitHub: github.com/shaquib2007

B.Tech Student · Computer Science & Engineering · AI/ML Focus
PCM Background · Practical Learner · Future AI/ML Professional

SKILLS

- Languages:** Python, C / C++, JavaScript
- Technologies:** HTML, CSS, React, TypeScript, SQL, DBMS, Tailwind CSS, Tauri
- Tools:** Git, GitHub, LocalStorage, PDF workflow
- Foundations:** AI/ML fundamentals, problem solving, team collaboration, adaptability, time management

PROJECTS

- NEET Strategy Dashboard | GitHub**2026
 - Built and maintained a static study-planning dashboard with overview, chapter tracking, roadmap, 31-day scheduling, daily study tracking, and performance analytics.
 - Added a syllabus database covering 20 Biology, 25 Chemistry, and 15 Physics chapters, with LocalStorage persistence and PDF strategy access.

Tech Stack: HTML, CSS, JavaScript, LocalStorage, PDF workflow · **GitHub:** github.com/shaquib2007/neet · **Live:** neet-self.vercel.app
- PromptForge | Private GitHub**Jul 2026
 - Developed an AI-powered prompt enhancement platform with a FastAPI backend, React frontend, authentication, and a protected enhancement endpoint.
 - Structured async database access, Redis rate limiting, AI provider routing, API documentation, automated tests, and CI/deployment configuration.

Tech Stack: Python, FastAPI, React, Tailwind CSS, PostgreSQL, Redis, Claude/Gemini APIs · **GitHub:** github.com/shaquib2007/Prompt_generator
- Video Player for macOS | Private GitHub**Jun 2026
 - Built a native desktop media library and player for local video and audio files, with library scanning and libmpv playback.
 - Implemented a structured Tauri + React desktop foundation with Rust IPC, playlists, settings, drag-and-drop, keyboard shortcuts, and subtitle/OSD workflows.

Tech Stack: Tauri v2, Rust, React, TypeScript, Vite, Tailwind CSS, Zustand · **GitHub:** github.com/shaquib2007/Video-player-for-macOS
- Jarvis Agent macOS | Private GitHub**Jun 2026
 - Designed a cross-platform AI desktop assistant with a React interface, Tauri/Rust host process, and embedded Python agentic backend.
 - Connected a LangGraph ReAct loop and LangChain tools for application control, notes, tasks, weather, voice, API requests, and streamed tool-event feedback.

Tech Stack: Python, LangChain, LangGraph, React, Tauri, Rust, Groq API · **GitHub:** github.com/shaquib2007/Jarvis-Agent-Mac-OS

TRAINING

- Programming Fundamentals using Python - Part 1**Jun 2026
 - OnWingspan · Course completion certificate
- Programming Fundamentals using Python - Part 2**Aug 2026
 - OnWingspan · Course completion certificate

CERTIFICATES

- Core Java Basics** · upGradJan 2026
- Big Data - 201** · Infosys SpringboardFeb 2026

ACHIEVEMENTS

- Published a functional study-planning dashboard with a public GitHub repository and live deployment.
- Built a practical workflow combining syllabus tracking, scheduling, progress persistence, roadmap access, and analytics in one project.
- Completed verified programming fundamentals training in Python Parts 1 and 2 during 2026.

EDUCATION

- Lovely Professional University**Phagwara, Punjab
 - Bachelor of Technology - Computer Science and EngineeringAug 2025-29 : Present
- Academic Background**India
 - Physics, Chemistry, and Mathematics (PCM)
